

Update on the Stanford 2018 General Use Permit

Recirculated Portions of the Stanford 2018 GUP Draft EIR

The County of Santa Clara will be recirculating the Alternatives Chapter of the Draft Environmental Impact Report (EIR) for the proposed Stanford 2018 General Use Permit (GUP). The project will also include an update to the Stanford University Community Plan, a policy document within the County General Plan.

The anticipated release date of the recirculated Alternatives Chapter of the Draft EIR is **June 12, 2018**, and the public review and comment period will continue for **45 days -- until July 26, 2018**.

The recirculated Alternatives Chapter will include two Additional Housing Alternatives that are designed to assist the public and decision-makers in understanding the implications of the construction of additional housing on the Stanford campus beyond that which is included in the proposed 2018 General Use Permit Application.

One of the Additional Housing Alternatives would analyze a level of on-campus housing that would provide enough housing units for the full increase in the Stanford-affiliated population that is expected to be generated by the proposed project's 2,275,000 net new square feet of academic and non-academic support space.

A second alternative would analyze a lesser increase in on-campus housing that would still be significantly more than Stanford's current request of 2,600 student and 550 faculty/staff /post-docs/medical residents housing units (total of 3,150 units/beds).

Both alternatives have more housing units than the Draft EIR originally considered, which is the reason for recirculation of the Alternatives Chapter.
